SOLDABLES Y GALVANIZABLES

# ACERO MODELADO DOBLE CERA

**FRANÇAIS :** Eléments décoratifs en acier moulé DOUBLE FACE, avec un encadrement en acier plat. S'agissant de pièces de fonderie, les dimensions peuvent varier légèrement, en raison du phénomène de retrait.

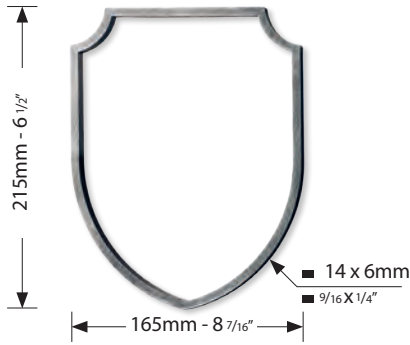

**DEUTSCH :** Zierelemente aus Schmiedeguß, DOPPELSEITIG mit Flachstahl umrahmung. Da es sich um Schmiedeguß handelt, können die Maße geringfügig abweichen.

**ENGLISH :** Decorative DOUBLE-FACED steel castings, with steel framings. Steel castings will shrink during the cooling process. As a result expect some variance in each casting from the dimensions shown in the catalog.

**NEDERLANDS :** DUBBELZIJDIG geprofileerde sierornamenten uit las- en verzinkbaar gietijzer, voorzien van frame uit strip.

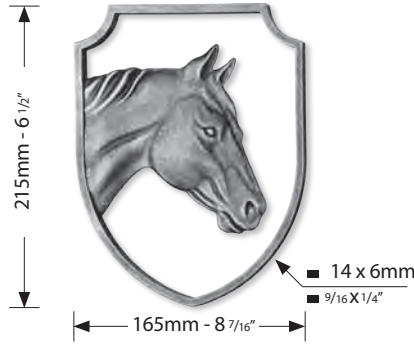

Het betreft gegoten staal, geringe maatafwijkingen zijn hierbij voorbehouden.

**ESPAÑOL :** Elementos decorativos de acero moldeado en DOBLE CERA con un recuadro de pletina de acero. Tratándose de piezas de fundición, las dimensiones pueden variar ligeramente debido a la retracción.
