

SB-Cleaner

6740.01 1

Before delivering the project and during maintenance we advise you to use SB-Cleaner 6740.01

SB-Super Cleaner

6740.02 1

If you encounter corrosion or defects caused by aggressive influences, use SB-supercleaner 6740.02

SB-Glue 50g

6740.03 1

SB-Glue 6740.03 is the ideal adhesive for cylindrical joints. Just a small quantity is sufficient to achieve solid bonding, as long as it is applied properly

SB-activator spray

6740.04 1

SB-activator spray ensures a faster curing time, which promotes better hardening

SB-Cleaner spray

6740.05 1

SB-Cleaner spray can be used to clean and degrease parts. This product should always be used before bonding parts together

SB-Screw retention 50g

6740.06 1

SB-Screw retention is the ideal adhesive for locking bolts and socket-head screws. After cleaning parts with SB SB-Cleaner 6740.05, apply a drop of this glue on the thread of the screw.
